So of course, your Internet connection will travel directly between your device and service providers to get online, making it much easier for them to block you from accessing certain sites. But with AnonyTun, Android users can have their internet going through a useful tunnel connection called VPN that prevents service providers from identifying you, allowing you to access whichever site you want. Feel free to work with interesting features in the AnonyTun app and enjoy high-speed Internet access while protecting your anonymity. Now users can easily access geo-limited services in any country. Learn how to optimize your Internet connection with the features available in the app. And protect yourself from potential threats with secure features in AnonyTun. Explore a clean and intuitive user interface that gives you quick access to certain features in the app. Explore advanced VPN settings that you can work with freely. And always receive the right updates that will increase features in the app. For those of you who are interested in the exciting mobile app AnonyTun, you can now enjoy a free version of the app on the Google Play Store that doesn't require you to pay for the download. However, since it's a freemium app, there are still ads and in-app purchases that you'll have to pay for if you want to enjoy AnonyTun to the fullest. In addition, it's also important that your Android devices run on the latest firmware version, preferably Android 4.1 and above. This should ensure device compatibility, especially when receiving new updates in the future. And to make sure that AnonyTun can work properly on your Android devices, users will need to provide certain access permissions that are needed to enable the many available features in AnonyTun. Here are all the exciting features that the app offers: For those of you who are interested, you can quickly get acquainted with the app and have access to its interesting features, thanks to the available features of AnonyTun. Have fun using and elegant design with an intuitive and user-friendly user to work freely with available features from the app. Application, multiple settings and enable VPN without the required registrations or root permissions. Most importantly, AnonyTun will allow Android users to connect to the unlocked Internet at the touch of a Connect button. Also, with multiple proxy servers around the world, they are all running at the highest speed. You will find it very easy to connect to stable networks and enjoy reliable connections, because the application always opts for the best possible server. What's more, unlike many other free VPN services that significantly reduce your connection speed, AnonyTun can still deliver impressive running speed. Therefore, you will hardly notice any differences with the enabled application. In addition, without bandwidth limits, you can conveniently enjoy the free app whenever you need it. Here at AnonyTun, users also have the option to choose between different tunnel options to further improve their internet connection. Feel free to work with the SSL tunnel, HTTP tunnel, and TCP tunnel, which are fully optimized to ensure the best Internet speed for your devices. Not to mention that you can easily switch between each one while using the app. And for advanced VPN users who know their ways around, AnonyTun provides many useful settings that you can do to better suit your preferences. Feel free to turn on stealth settings that allow you to pre-customize VPN services. From changing the connection protocol, connection port, to modifying customized TCP/HTTP, and many other advanced settings, AnonyTun will allow Android users to truly enjoy the unlocked Internet. On top of that with AnonyTun, users can easily bypass all types of restrictions in your country, allowing you to access transparent internet at any time. Now, there won't be any online services and websites that you can enjoy if you know how to work with AnonyTun. In addition, the free VPN service also provides a secure connection that gives you anonymity to access the Internet. Therefore, you will not find yourself the target of unwanted online threats. In addition, with the free and unlocked AnonyTun app on our android website users can now enjoy amazing VPN apps on their mobile devices. Don't be afraid to work with included features in the app without having to pay for them. Most importantly, we also get rid of annoying ads within the app. So, allowing you to enjoy AnonyTun to the fullest. All you need is to download and install AnonyTun Mod APK on our website. AnonyTun Pro Mod APK - App Screenshot App Features Bypass any type of limitations SSL tunnel, HTTP tunnel and TCP tunnel without bandwidth limits (unlimited bandwidth) It's fast, free and secure NO ROOT requires no registration needed It's free Clean and elegant design with super user friendly Want to try it: Betternet VPN VPN Mod Premium APK Review App Edward Maosa: It helped me a lot when it comes to data storage. I couldn't imagine it would work, but I confirmed it. I'm on youtube, 24/7. Thank you for this app and I hope it will be free forever, not in the short term. I love it, just that sometimes when I've used it for a while, it stops connecting until the next day, that's where it's limited. Royd M: Works almost perfectly. Servers slow down a lot at night, but this is expected as it's rush hour. My only problem is server busy scenarios. I can swear they started in version 9.1 and lasted for 9.4. Me thinks it's a mistake and not that there has been a sudden increase in users leading to a server occupied by Chibusu Chiti: Simply the best things are free That's one of the best. Discussions about ads are sloppy because you don't interact with the app, you connect and you continue with your business because it serves you. You.
